people of the United States have never evinced, nor do
they feel say desire to interfere in public questions not
affecting the relations existing between the States of the
American Continent.

We leave the European powers exclusive control over
matters affecting their Continent and the relations of their
different States.

The United States claim a similar exemption from any
such interference on their part. The Treaty with Texas
was negotisted from considerations of a high public poliey influencing the conduct of the two Republics. We
have treated with Texas as an independent, power, solely
with a view of bettering the condition of the two countries. If annexation in any form occur, it will arise from
the free and unfattered action of the people of the two countries; and it seems altogether becoming in me to say that
the honor of the country, the dignity of the American
name, and the permanent interests of the United States
would forbid acquiescence in any such interference. No
one dan mere highly appreciate the value of peace to both
Great Britain and the United States and the capacity of
each to do injury to the other than myself; but peace can
beet be preserved by maintaining fivally the rights which
belong to us as an independent community.

So much I have considered it proper for me to say, and
it becomes me only to add, that while I have regarded the
annexation to be accomplished by treaty as the most
suitable form in which it could be effected, should Congress deem it proper to resort to any other expedient compatible with the constitution, and lakely to accomplish
the object, I stand prepared to yield my most prompt and
active co operation.

The great question is not as to the manner in which it
shall be done, but whether it shall be accomplished or
act. POISONS! POISONS! POISONS!

MR. WILLIAM HILL:

SIR:—I take pleasure in acknowledging the great benefit! have received from the use of your Infallible Ouguent for the Hair. Indeed, I value it so highly, from my own experience of its virtue, that I consider it my duty to recommend it to others who may suffer as I have done from the loss of hair. About two years ago my hair had become so frightfully thin from its continual falling off, that I had seriously thought of rearring to the expedient of shaving, which I had once before adopted. But fortnately I was diverted from this purpose by a friend (to whom I had casually apoken of the state of my hair!) who strongly driged me to try your preparation, which was the first intimation I had of, it, or even your own exitance. I am happy to say that this information has been of inesticulable benefit to me, for I had not used quite two boxes of your Onguent before my lair saturely ceased to fall off, and began to grow; anon assuming a freath and vigorous appearance—with continued as physications it gradually became thicker and fuller, until I had a better head of hair than I ever had before. I still use the Onguent as a toilecto powmade, and have no hesitation in saying the most, or simply as a toilecto pommade, your preparation is the very best that I have eyes seen.

HENDE SENDEMBER 25, 1841.

I do certify, that I have been serious afflicted with dandred and falling off of the hair, and made use of several articles, and to be a sure temedy for the same, and found no benefit arising from them, but quate the reverse. GREAT IMPROVEMENT IN SURGERY.

THE FOLLOWING is the statement of Capt. HIGHARD
1 YATES—in the year 1845, I was taken with ulcerations in my legs, and made application to a physician, who prescribed for me; but the disease continued to increase; it sow began to show itself in my arms, I called another physician, who prescribed for me; but the disease continued to increase; it sow began to show itself in my arms, I called another physician, under whose care I remained for several menths. At this time the ulcrations became very extensive, my legs and arms were so painfuly contracted that I was compelled to use crutches; is applied to other physicians, but with no better success. By this time the pain in my bones and head became so excruciating, and the ulcerations gained so rapidly, that I was confined to my bed, giving up all hopes of ever being cured. This was in the winter of 1843. I then tried the Indian doctom, and all the advertised mostrums, but with no beneficial result. At this discreasing along of my disease, I acciden ally became acquainted with a German physician, Dr. Joseph Heine, who now resides at No. 20 Duane street, near Charlam. The medicine this gentleman prescribed for me proved immediately efficacious, the pains in my bones began to subside, the ulcerations becan to heal, my limba began to gain strength, and for the first time in twelve months I was enabled to piace my jest upon the ground, with the assurance that they would sustain the weight, of my attenuated body. This truly attenuating revolution in my system and been produced in the short of period two months from the time I had first takes Dr. Joseph Heure's practificions.
